

Shirley Page Organic Oils

22.01.2010

Dear Claire,

I will always thank you for introducing me to Claudia Lauch, she is so thorough.

What a result! I have lost two and a half stones in six months, and have a clean bill of health. Problems that marred my life such as serious obesity, high blood pressure, depression and exhaustion are now left behind for good.

Several of my vital organs were not functioning properly. Is it any wonder that my prolonged and failed attempts to lose weight left me feeling quite ill and as heavy as ever?

Claudia's resume reflects the dedication that she brings to her work. This was immediately apparent during the first consultation. Blood tests confirmed her correct diagnosis, follow up tests 2 months later revealed scientific proof that positive progress had been made, and the scales were no longer my enemy.

Over the last six months I have taken her natural supplements and tinctures, followed the dietary advice and so importantly followed her regime. Always there to support, to re-adjust, and when I asked for more information Claudia repeatedly gave me detailed explanations of how the body works. I have learned lessons that will help me throughout my life. I still have more to lose and will achieve the loss.

I wish that I had some before and after photographs, but you know I always managed to avoid the camera.

I dread to think of the harm that had been caused by the highly dangerous fat settling around my internal organs; the invisible fat. I now look forward to a longer and healthier life, thanks to Claudia.

I very much look forward to seeing you again

Fond regards
